Axiom Addiction Program in **Uniontown, New Kensington and Jeannette/Greensburg** has adopted an “Open Door” policy. During normal business hours, walk ins are accepted for treatment. If the individual meets criteria for MAT Outpatient treatment, including Suboxone, Axiom will prescribe the medication that day and provide stabilization therapy.

If the individual wants to pursue inpatient treatment, Axiom will offer stabilization with low dose MAT until a bed is open for them.

It is Axiom’s hope that this Open Door policy will allow those struggling with withdrawal, active addiction, or have recently overdosed to receive immediate stabilization and entrance into medically assisted treatment without the usual wait of an appointment time. By eliminating the wait for treatment, we are hoping to prevent overdoses and save lives.

Please call our offices with any questions regarding our program.
